EXPERIENCE

Sony India Software Centre

Software Engineer

Sep. 2021 – Oct. 2022

Bengaluru, India

PlayStation Stars

- Developed modular React components from UI/UX wireframes using JavaScript, HTML, Sass, and Context API, **improving page-load speed by 10%**
- Shipped PlayStation Stars reward and redemption experiences for PS4 and PS5, contributing to a **5% increase in active users**
- Optimized responsive experiences and validation workflows for 10K+ users, **reducing support tickets by 10%**
- Implemented genre, platform, and price filters for the PlayStation Store, **increasing product discovery by 15%**
- Fine-tuned PlayStation Network API caching, **reducing server latency by 20%** and improving response times for 2M+ users
- Expanded frontend tests, code reviews, and Git workflows, reducing technical debt and **accelerating development by 2x**

One Sony Data Stack

- Architected a React-based campaign activation module, **increasing targeted campaign conversion rates by 8%**
- Built drag-and-drop campaign interfaces, **reducing targeted campaign creation time by 50%**
- Designed an analytics dashboard for campaign segmentation, **improving targeting accuracy by 12%** across 110M+ PS4 and PS5 users
- Created 50+ reusable, high-performance React components, contributing to a **25% improvement in user satisfaction**
- Integrated frontend workflows with REST APIs and AWS services while collaborating with product, data, QA, and engineering teams

Hewlett Packard Enterprise

Software Developer Intern, Enterprise Tools

Feb. 2021 – Aug. 2021

Bengaluru, India

MSP Workbench on Microsoft Azure

- Built frontend inventory and order-management workflows for MSP Workbench, streamlining internal HPE operations
- Integrated React interfaces with Azure-hosted APIs, **improving reporting speed by 24%** through debugging and automated testing
- Implemented product and inventory search functionality, **improving user productivity by 15%**
- Developed unit tests for frontend workflows, **increasing code coverage by 20%** and improving release quality
- Collaborated with cross-functional teams in an Agile environment to adapt features to changing business requirements

PROJECT

Developer Portfolio – Interactive Project Showcase

React, Vite, Tailwind CSS, Three.js

- Built and deployed a React/Three.js portfolio with EmailJS, showcasing projects through optimized builds

EDUCATION

The George Washington University <i>Master of Science in Computer Science, GPA: 3.61/4.0</i>	Aug. 2024 – May 2026 Washington, DC
BMS College of Engineering <i>Bachelor of Engineering in Computer Science and Engineering, GPA: 3.84/4.0</i>	Aug. 2017 – May 2021 Bengaluru, India

SKILLS

Languages : TypeScript, JavaScript, Python, SQL, HTML/CSS
Frontend : React.js, Context API, Redux, Sass, Responsive UI, Reusable Component Development
Cloud and Data : AWS, Azure, Kubernetes, PostgreSQL, MySQL, REST APIs, Data Management, API Data Workflows
Testing : React Testing Library, Unit Testing, API Testing, Postman, Debugging, Code Reviews
Development : Git, GitHub, Agile, Scrum, Jira, Technical Documentation, Cross-Functional Collaboration

CERTIFICATIONS

DeepLearning.AI : LangChain for LLM Apps (Jul. 2025)	AWS Academy : Cloud Operations (Apr. 2025)
Red Hat : OpenShift Developer I (Apr. 2025)	edX : DevOps and SRE (Apr. 2025)
