

ROHITH YELLAMBALASE VIJAYAKUMAR

Arlington, VA — 703-928-9149 — rohithyv@gwu.edu — linkedin.com/in/rohith-yv — github.com/rohithyv — portfolio-rohithyv.vercel.app

SUMMARY

Software Engineer with experience developing product-focused web applications across customer-facing and internal enterprise platforms. Skilled in React.js, JavaScript, REST APIs, SQL, debugging, testing, and cloud-based development. Contributed to PlayStation Stars at Sony and HPE's Inventory Management System by building reusable UI components, API-integrated workflows, and tested frontend features.

EDUCATION

The George Washington University

Master of Science in Computer Science, GPA: 3.61/4.0

Washington, DC

Aug 2024 – May 2026

BMS College of Engineering

Bachelor of Engineering in Computer Science and Engineering, GPA: 3.84/4.0

Bengaluru, India

Aug 2017 – May 2021

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, HTML, CSS, Responsive UI, React Router, Tailwind CSS

Backend/API: FastAPI, Node.js, Express.js, REST APIs, OpenAPI/Swagger, API Integration

AI Integration: OpenAI API, Anthropic API, Prompt Engineering, RAG Basics

Databases: PostgreSQL, MySQL, MongoDB, Redis

DevOps/Cloud: Docker, GitHub Actions, CI/CD, AWS, Azure

Testing/Tools: pytest, Jest, Postman, Unit Testing, Integration Testing, Debugging

PROFESSIONAL EXPERIENCE

Sony

Software Engineer, PlayStation Stars Team

Bengaluru, India

Sep 2021 – Oct 2022

- Developed React.js UI components for PlayStation Stars, improving campaign interfaces, rewards discovery, engagement flows, and cross-device customer experience.
- Integrated UI workflows with backend API services using reusable API client logic, authentication headers, request validation, error handling, caching-aware calls, and response parsing.
- Improved page responsiveness by 30% through component optimization, reusable frontend patterns, performance tuning, and collaboration with QA, backend, and product teams.

Hewlett Packard Enterprise

Software Developer Intern, Enterprise Tools

Bengaluru, India

Feb 2021 – Aug 2021

- Built React-based internal dashboard modules for inventory management, including product tables, stock dropdowns, order updates, reporting views, and API-connected workflows.
- Integrated REST APIs with database-driven workflows using SQL queries, MySQL/MongoDB storage, Azure-based integrations, API debugging, and Postman validation.
- Improved reporting and search functionality by 30% by enhancing UI workflows, validating API responses, resolving frontend defects, and supporting tested enterprise releases.

PROJECTS

WeCureIT – Clinic Reservation and Management System

React, Spring Boot, PostgreSQL, Redis, Docker

- Developed a full-stack clinic reservation platform with role-based patient, doctor, and admin workflows using React, backend REST APIs, PostgreSQL operations, Redis sessions, and Docker.
- Troubleshoot CORS, 401 authorization, 404 routing, and 500 server errors using Postman, logs, SQL validation, browser debugging, and API testing workflows.

GeoPulse Pro – Voice-Enabled Location Intelligence Web App

JavaScript, Geoapify API, Leaflet.js

- Built a responsive location-based web app using HTML, CSS, JavaScript, Geoapify Places API, Leaflet.js, OpenStreetMap, and browser geolocation to find nearby services.
- Implemented voice-to-text search using Web Speech API and text-to-speech feedback with SpeechSynthesis for hands-free nearby place search and result updates.

Developer Portfolio – 3D Project Showcase Website

React, Vite, Tailwind CSS, Three.js, EmailJS

- Built and deployed a responsive React.js portfolio with Vite, React Router, Tailwind CSS, Three.js, React Three Fiber, EmailJS, reusable components, and recruiter contact form.

CERTIFICATIONS

DeepLearning.AI: LangChain for LLM Application Development – Jul 2025

AWS Academy Cloud Operations – Apr 2025

Red Hat OpenShift Developer I: Containers with Podman – Apr 2025

edX: Introduction to DevOps and Site Reliability Engineering – Apr 2025
